Summary

AI/ML Engineer with internship experience in LLM applications, agentic AI, deep learning, and computer vision. Builds and deploys AI systems using Python, FastAPI, LangChain, LangGraph, TensorFlow, PyTorch, and n8n, with REST APIs, webhooks, Azure, and CI/CD.

Experience

AI/ML Intern Jul 2026 – Present
Ebryx *Lahore, Pakistan*

- Completed **ML**, **deep learning** (CNN, RNN, LSTM), and **NLP** tracks, including **transformer** fine-tuning (DistilBERT); building **LLM** prototypes with **LangChain**, **LangGraph**, Hugging Face.
- Built and shipped **LLM-powered CV screening pipeline** (**LangGraph**, Groq, Gemini) automating JD-to-candidate requirement matching with weighted scoring and three-tier shortlisting.

ML Intern Jun 2024 – Aug 2024
Punjab Information Technology Board (PITB) *Lahore, Pakistan*

- Developed and evaluated **deep learning** models using **TensorFlow** and **Keras**.
- Implemented and optimized **CNN** and **RNN** architectures for **computer vision** tasks.
- Performed data preprocessing and augmentation for model training and evaluation.
- Collaborated with engineers to improve model performance, accuracy, and training efficiency.

Projects

WhatsApp Ordering Assistant | *Python, FastAPI, LangChain, Groq, Gemini, Supabase, Azure, CI/CD*

- Built **LLM-powered WhatsApp ordering assistant** with **FastAPI** and **LangChain** tool-calling agents, Groq/Gemini model fallback, and **Supabase** (PostgreSQL) database.
- Deployed to **Azure App Service** with **GitHub Actions CI/CD**; live on **WhatsApp Cloud API** with HMAC-verified webhooks.
- Implemented human-in-the-loop approval buttons for staff and cost-aware notification design.

CV Screening Pipeline | *Python, LangGraph, Groq, Gemini, Pydantic, Streamlit*

- Built **LLM-powered CV screening pipeline** with **LangGraph**: JD parsing into weighted requirements, evidence-backed candidate scoring, and three-tier shortlisting with human review.
- Orchestrated multi-LLM workflow (**Groq** for JD parsing, **Gemini** for CV matching) with PDF/DOCX ingestion and model A/B testing; shipped as CLI and **Streamlit** app.

Deepfake Detection and Awareness Platform | *Python, TensorFlow, FastAPI, React, Laravel, LIME*

- Developed image and video deepfake detection platform using **CNN-LSTM** and transfer learning.
- Implemented **explainable AI (XAI)** with **LIME** for model prediction visualization.
- Integrated **FastAPI** inference backend with Laravel and React for media upload, inference, and result visualization.

Education

University of Management and Technology Lahore, Pakistan
Bachelor of Science in Computer Science *Oct 2021 – Aug 2025*

Technical Skills

Languages & Web: Python, SQL, JavaScript, React, Laravel, HTML, CSS
AI & Machine Learning: TensorFlow, PyTorch, Keras, Scikit-learn, Hugging Face Transformers, OpenCV, YOLO, NLP, Computer Vision, CNN, LSTM, Explainable AI (LIME), Pandas, NumPy
LLMs & Agentic AI: LangChain, LangGraph, CrewAI, AI Agents, Tool Calling, LLM Orchestration, Prompt Engineering, RAG, Groq API, Gemini API, Human-in-the-Loop
Backend & APIs: FastAPI, REST APIs, Webhooks (HMAC), n8n, Streamlit
Cloud, DevOps & Databases: Azure App Service, CI/CD, GitHub Actions, Git, PostgreSQL, MySQL, Supabase
